

GPM™ Nutrients

Custom Formulation

Market-ready blends of fermented nutrients

Our new market-ready blends are a whole new way to incorporate whole food, fermented nutrients into your formulations. Using our proprietary, fermented nutrients, our scientists have created blends for some of the highest market-demand products. These market-ready blends make your next innovation easier than ever.

Get the whole story

Fermented nutrients are bound to a whole food source and may be more bioavailable than conventional nutrients.* Our GPM™ nutrients are fermented and are available in a full array of vitamins and minerals. We also have options that are organic and soy-free.

Be a trend setter

Fermented nutrients are one of the fastest growing segments in the vitamin and mineral category. Set your brand, or your customer's brand, apart from the crowd with these distinctive offerings. Fermented nutrients can attract a premium shopper to your brand.

Jumpstart your project

Our fully formulated blends help you get to market faster. Use them as a starting point or a final formulation, either way, your product development time is shorter. Need something else? We can create a customized formula, too.

Simplify your process

Our blends are ready to go so you have fewer raw materials to order, inventory and manage. And, because the formulas are pre-blended, there's less variation in your process from handling multiple components. We can provide market ready blends for a variety of delivery formats.

Our market-ready blends can be tailored to meet your individual business needs

- Available in organic and non-organic versions
- Customizable to provide different health benefits
- Can be modified for a variety of delivery formats such as tableting, ready to mix powders, gummies or chewable tablets
